

# Vegetable Seeds Catalogue

*Where every seed counts*

# Hybrid Tomato Seeds

## ▪ Muco F1

- Planting Season:** Spring / Autumn
- Environment:** Open field
- Plant:** Determinate, strong vigor, compact, good fruit coverage, excellent fruit set
- Fruit:** Oval-blocky saladette. 140-200 gr, uniform size and shape, deep red color and very good shelf life
- Resistances:** VaVd, F1, ToMV 1-3, TSWV, TYLCV, Totv

## ▪ Gil F1

- Planting Season:** Spring / Autumn
- Environment:** Open field
- Plant:** Semi-determinate, strong vigor, compact, good leaf coverage, excellent fruit set in cold temperatures
- Fruit:** Oval-blocky saladette. 130-180 gr, uniform size and shape, deep red color and very good shelf life
- Resistances:** VaVd, F3, ToMV 1-3, TSWV, TYLCV

# Basalt F1

- Planting Season:** All year
- Environment:** Open field
- Plant:** Determinate, strong vigor, compact, good leaf coverage, excellent fruit set in hot and cold temperatures
- Fruit:** Elongated saladette. 140-200 gr, uniform size and shape, great firmness
- Resistances:** VaVd, F2, ToMV 1-3, TSWV, TYLCV

# Rolico F1

- Planting Season:** All year
- Environment:** Open field
- Plant:** Strong compact plant with good leaf coverage and high field resistances. Suitable also for low trellising
- Fruit:** High quality fruits with round shape, excellent firmness and good color. 170-220 gr
- Resistances:** VaVd, F2, N, ToMV 1-3, TSWV, TYLCV

## ■ Dorci F1

- Planting Season:** Spring / Autumn
- Environment:** Protected / Open field
- Plant:** Strong plant, good balance between leaves and fruits
- Fruit:** Oval, elongated saladette type with perfect shape and a deep red color. 140-180 gr. Firmness is excellent and so is shelf life
- Resistances:** VaVd, F3, ToMV 1-3, TSWV, TYLCV, Pto

## ■ Toliso F1

- Planting Season:** Spring / Autumn
- Environment:** Protected
- Plant:** Vigorous healthy plant with great setting ability in different climate conditions
- Fruit:** Deep red color, high tolerance to cracking and good firmness. Heart shape. 120-160 gr
- Resistances:** VaVd, F 3, ToMV 1-3, TSWV, TYLCV

## ■ Jessica F1

- Planting Season:** Spring / Autumn
- Environment:** Protected / Open field
- Plant:** Strong plant suitable for long crop.  
Excellent setting abilities
- Fruit:** Oval blocky shape, good size along  
the crop, great firmness, 160-200 gr
- Resistances:** VaVd, F2, N, ToMV 1-3, TSWV, TYLCV

## ■ Diorite F1

- Planting Season:** All year
- Environment:** Protected
- Plant:** Indeterminate, balanced plant  
behavior, excellent fruit set in hot and  
cold temperatures, short distance  
between the clusters
- Fruit:** Round, deep shape 140-170 gr,  
uniform size and shape, good shelf life  
and firmness
- Resistances:** VaVd, F2, N, ToMV 1-3, TSWV, TYLCV

# Obsidian F1

- Planting Season:** Spring / Autumn
- Environment:** Open field
- Plant:** Very strong plant structure, very good fruit setting in hot conditions, good balance leaves / fruits
- Fruit:** Flat round, 150-200 gr, deep red, very firm, strong against cracking. Very uniform shape
- Resistances:** VaVd, F2, N, ToMV 1-3, TSWV, TYLCV

# Merilon F1

- Planting Season:** Spring / Autumn
- Environment:** Protected / Open field
- Plant:** Healthy plant with great setting ability in different climate conditions
- Fruit:** Deep red color, high tolerance to cracking and good firmness. Flat round shape. 150-200 gr
- Resistances:** VaVd, F2, N, ToMV 1-3, TSWV, TYLCV

## • Erica F1

- Planting Season:** Spring / Autumn
- Environment:** Protected / Open field
- Plant:** Strong plant suitable for long crop. Excellent setting abilities in cold conditions
- Fruit:** Round shape, good size along the crop, great firmness, 160-200 gr
- Resistances:** VaVd, F2, N, ToMV 1-3, TSWV, TYLCV

## • Veronica F1

- Planting Season:** Spring / Autumn
- Environment:** Protected / Open field
- Plant:** Strong plant suitable for long crop. Excellent setting abilities in cold conditions
- Fruit:** Round shape, good size along the crop, great firmness, 230-260 gr
- Resistances:** VaVd, F2, N, ToMV 1-3, TYLCV

## • Ferrera F1

- Planting Season:** Spring / Autumn
- Environment:** Protected / Open field
- Plant:** Vigorous compact plants, suitable for spring and fall plantings, with excellent setting ability and fruit uniformity. Early to mature
- Fruit:** Deep red color, good size also in late stage of the crop, high tolerance to cracking and high firmness.  
220-280 gr
- Resistances:** VaVd, F3, N, ToMV 1-3, TSWV, TYLCV

## • Balerria F1

- Planting Season:** Spring / Autumn
- Environment:** Protected
- Plant:** Vigorous healthy plant, suitable for spring and fall plantings, with excellent setting ability and high fruit uniformity
- Fruit:** Deep red color, good size also in late stage of the crop, high tolerance to cracking and excellent firmness.  
Nice fishbone cluster. 140-170 gr
- Resistances:** VaVd, F3, N, ToMV 1-3, TSWV, TYLCV

## ■ Bordeaux F1

- Planting Season:** Spring / Autumn
- Environment:** Protected / Open field
- Plant:** Strong plant suitable for long crop. Early production and excellent setting abilities
- Fruit:** Cluster harvest, beautiful fishbone, round shape, good size along the crop, great firmness, 150-180 gr
- Resistances:** VaVd, F2, N, ToMV 1-3, TSWV, TYLCV

## ■ Grimso F1

- Planting Season:** Spring / Autumn
- Environment:** Protected
- Plant:** Vigorous compact plants, suitable for spring and fall plantings, with excellent setting ability and fruit uniformity. Early to mature
- Fruit:** Beautiful pink color, big size fruit, high tolerance to cracking and good taste. 250-300 gr
- Resistances:** VaVd, F2, N, ToMV 1-3, TYLCV

## ■ Pimoso F1

**Planting Season:** Spring / Autumn

**Environment:** Protected

**Plant:** Vigorous compact plants, suitable for spring and fall plantings, with excellent setting ability and fruit uniformity. Early to mature

**Fruit:** Beautiful pink color, uniform fruit size, high tolerance to cracking and good taste. 180-250 gr

**Resistances:** VaVd, F2, N, ToMV 1-3, TYLCV

## ■ Starlight F1

**Planting Season:** Spring / Autumn

**Environment:** Protected

**Plant:** Strong with good fruit setting, uniform trusses

**Fruit:** Plum shape 10-15 gr. deep red color, good shelf life and can remain long time on the plant

**Resistances:** VaVd, F3, N, ToMV 1-3, TYLCV, Sm

## Julia F1

- Planting Season:** Spring / Autumn
- Environment:** Protected / Open field
- Plant:** Strong plant with short internodes. Early production and excellent setting abilities
- Fruit:** Cluster or single fruit harvest, beautiful red color, mini plum shape, good size along the crop, good firmness and good taste, 15-25 gr
- Resistances:** VaVd, F2, N, ToMV 1-3, TSWV, TYLCV

## Moricita F1

- Planting Season:** Spring / Summer
- Environment:** Protected / Open field
- Plant:** Vigorous healthy plant with great setting ability in different climate conditions. Suitable for spring and summer plantations
- Fruit:** Deep red color, high tolerance to cracking and good firmness. Sweet taste. 15-25 gr
- Resistances:** VaVd, F2, N, ToMV 1-3, TYLCV

# Orange Candy F1

**Planting Season:** Spring / Autumn

**Environment:** Protected

**Plant:** Strong plant with good leaf coverage. Early production and excellent setting abilities in different climate conditions

**Fruit:** Single fruit harvest, beautiful orange color, mini plum shape, excellent taste, 15-25 gr

**Resistances:** VaVd, F2, N, ToMV 1-3

# Brio F1

**Planting Season:** Spring / Autumn

**Environment:** Protected / Open field

**Plant:** Strong plant with good setting ability

**Fruit:** Plum shape 12-15 gr  
Nice chocolate color with good taste and long shelf life

**Resistances:** VaVd, ToMV 1-3, TYLCV

## ■ Allnatt F1

- Planting Season:** Spring / Autumn
- Environment:** Protected
- Plant:** Good fruit setting, strong plant, good resistance package
- Fruit:** Size 20-25 gr. good color and good firmness. High tolerance to cracks in cold weather. Good taste
- Resistances:** VaVd, F1, ToMV 1-3, TYLCV

## ■ Red Lady F1

- Planting Season:** Spring / Autumn
- Environment:** Protected
- Plant:** Strong plant with good leaf coverage, suitable for long crop. Early production and excellent setting abilities in different climate conditions
- Fruit:** Cluster or single fruit harvest, round shape, nice intense color, good size and uniformity, good firmness, 15-25 gr
- Resistances:** VaVd, F2, N, ToMV 1-3, TSWV, TYLCV

# Yellow Baby F1

**Planting Season:** Spring / Autumn

**Environment:** Protected

**Plant:** Strong plant with good leaf coverage, suitable for long crop. Early production and excellent setting abilities in different climate conditions

**Fruit:** Single fruit harvest, round shape, yellow color, good size and uniformity, 20-25 gr

**Resistances:** VaVd, F2, N, ToMV 1-3

# Hybrid Pepper Seeds

## Judea F1

- Planting Season:** Spring / Autumn
- Environment:** Protected / Open field
- Plant:** Very strong plant with amazing fruit set in hot conditions
- Fruit:** Very thick wall with excellent firmness, 180-220 gr, uniform size, can remain on the plant long time. Deep red color
- Resistances:** L4

## ■ Scoria F1

- Planting Season:** Spring
- Environment:** Protected / Open field
- Plant:** Strong plant, compact with good recovery, high yield
- Fruit:** Very good shape and uniformity, thick wall and good shelf life, 160-200 gr
- Resistances:** L3, TSWV, Xcv

## ■ Josephine F1

- Planting Season:** Autumn
- Environment:** Protected
- Plant:** Strong plant, compact with good recovery, very high yield, good powdery mildew resistance
- Fruit:** Excellent shape and uniformity, thick wall and good shelf life, 150-180 gr
- Resistances:** L4, TSWV, Lt

## ■ Goni F1

**Planting Season:** Spring / Autumn

**Environment:** Protected

**Plant:** Compact with short internodes and open plant habit. Capable of having excellent fruit set in different climate conditions

**Fruit:** Can be harvested green or red.  
Nice blocky shape and long shelf life.  
180-220 gr

**Resistances:** L4, TSWV, N, Lt

## ■ Gomeu F1

**Planting Season:** Spring / Autumn

**Environment:** Protected

**Plant:** Medium with short to medium internodes and open plant habit. Capable of having excellent fruit set in different climate conditions. Good leaf coverage

**Fruit:** Can be harvested green or red.  
Nice blocky shape and long shelf life.  
190-230 gr

**Resistances:** L4, TSWV, N, Lt

## ■ Samson F1

- Planting Season:** Spring / Autumn
- Environment:** Protected / Open field
- Plant:** Strong plant with upright habit and high setting ability in different climate conditions
- Fruit:** 220-240 gr. Can be harvested green or red. Thick wall and long shelf life
- Resistances:** L3

## ■ Carlson F1

- Planting Season:** Spring / Autumn
- Environment:** Open field
- Plant:** Red Lamuyo pepper for growing in open field or in net-house. Strong plant with excellent setting abilities and good leaf coverage. TSWV resistant
- Fruit:** 220-250 gr. High uniformity, nice deep red color
- Resistances:** L3, TSWV

## • Rocher F1

- Planting Season:** Spring / Autumn
- Environment:** Protected / Open field
- Plant:** Strong plant, medium tall, high yield
- Fruit:** Very good shape and uniformity, thick wall, good lemon color, and good shelf life, 180-220 gr
- Resistances:** L4, TSWV

## • Murray F1

- Planting Season:** Spring / Autumn
- Environment:** Protected / Open field
- Plant:** Strong plant, tall, high yield and good recovery, good set in hot conditions
- Fruit:** Very good shape and uniformity, thick wall, good lemon color and good shelf life, 170-230 gr
- Resistances:** L4, TSWV

## Blondi F1

**Planting Season:** Spring / Autumn

**Environment:** Protected

**Plant:** Compact with short internodes and open plant habit. Capable of having excellent fruit set in different climate conditions.

**Fruit:** Beautiful yellow color through the season. Nice blocky shape and long shelf life. 180-220 gr

**Resistances:** L4, TSWV, N, Lt

## Delilah F1

**Planting Season:** Spring / Autumn

**Environment:** Protected / Open field

**Plant:** Yellow Lamuyo pepper for growing in open field or in net-house. Strong plant with excellent setting abilities and good leaf coverage

**Fruit:** 220-240 gr. High uniformity, nice lemon color

**Resistances:** L3

## ▪ Fanta F1

**Planting Season:** Spring / Autumn

**Environment:** Protected

**Plant:** Orange Blocky pepper for growing protected or open field. Strong plant with short internodes, excellent setting abilities and good leaf coverage

**Fruit:** 180-220 gr. High uniformity, nice deep orange color

**Resistances:** L4, TSWV

## ▪ Fantasy F1

**Planting Season:** Spring / Autumn

**Environment:** Protected

**Plant:** Orange Blocky pepper for growing protected or open field. Strong plant with medium-long internodes, excellent setting abilities and good leaf coverage. Suitable for long crop

**Fruit:** 180-220 gr. High uniformity, nice deep orange color

**Resistances:** L4, TSWV

# Happy Plus F1

**Planting Season:** All year

**General Features:** Good fruit setting, strong plant, uniform fruit size, great taste, bigger fruit size compared to happy, with extra TSWV resistance

**Benefits:** Good fruit size and high yield

**Resistances:** L4, TSWV

# Grumpy Plus F1

**Planting Season:** All year

**General Features:** Good fruit setting, strong plant, uniform fruit size, great taste, bigger fruit size compared to grumpy, with extra TSWV resistance

**Benefits:** Good fruit size and high yield

**Resistances:** L4, TSWV

## ■ Bashful Plus F1

**Planting Season:** All year

**General Features:** Good fruit setting, strong plant, uniform fruit size, great taste, bigger fruit size compared to bashful, with extra TSWV resistance

**Benefits:** Good fruit size and high yield

**Resistances:** L4, TSWV

## ■ Lutus F1

**Planting Season:** All year

**General Features:** Good fruit setting, strong plant, uniform fruit size 14-17 cm long, excellent heat set, high yield. Suitable for open field

**Benefits:** Good fruit size and high yield

**Resistances:** L3

## Shushka F1

**Planting Season:** All year

**General Features:** Long conical fruit, 12-15 cm, light green color, great spicy taste, balanced plant with high yield potential

**Benefits:** Great yield potential under different conditions

**Resistances:** L1

## Sami F1

**Planting Season:** All year

**General Features:** Medium conical fruit, 8-10 cm, dark green color, great spicy taste, balanced plant with high yield potential

**Benefits:** High uniformity and fruit quality

**Resistances:** L1

## ▪ Motzio F1

**Fruit shape:** Half-long

Drop type (half long) eggplant for growing open field or in net-house

**Plant:** Very strong plant with excellent yield potential. Early and continuous production, suitable for spring and summer plantings. Requires low labor action and enables long crop with great fruit quality and yield

**Fruit size:** 300-400 gr. nice drop shape, keeps its dark purple color in hot temperature, great taste and texture with long shelf life

## ▪ Robio F1

**Fruit shape:** Half-long

Drop type (half long) eggplant for growing open field or in net-house.

**Plant:** Very strong plant with excellent yield potential. good continuous production, suitable for autumn and winter plantings. Good for long crop with great fruit quality and yield

**Fruit size:** 300-400 gr. nice drop shape, keeps its dark purple color in hot temperature, great taste and texture with long shelf life

## ■ Pivtoro F1

- Fruit shape:** Oval  
Orange Ananas type melon
- Plant:** Strong plant with great setting ability. Suitable for spring and summer plantings with good adaption to different climate conditions. Fruits are highly uniform, with nice netting, attractive orange flash, small seed cavity and excellent taste
- Fruit size:** 2.5-3 kg
- Resistances:** F1-2, PM1

## ■ Kantara F1

- Fruit shape:** Round  
Sharante type melon, orange flash
- Plant:** Strong plant with great setting ability. Suitable for spring and summer plantings with good adaption to different climate conditions. Fruits have great texture, small seed cavity and excellent taste
- Fruit size:** 1.3-1.8 kg
- Resistances:** F1-2, PM1

## Atlantis F1

- Fruit shape:** Oval  
Yellow Canary type melon, white flash  
Vigorous plant with great setting ability. Suitable for spring and summer plantings with good adaption to different climate conditions. Early maturity. Fruits are highly uniform with great taste and long shelf life
- Fruit size:** 2-2.5 kg
- Resistances:** F1-2, DM, PM1

## Golan F1

- Fruit shape:** Round  
Galia type melon, green flash  
Vigorous plant with great setting ability. Suitable for spring and autumn plantings with good adaption to different climate conditions. Early maturity. Fruits are highly uniform with great taste and nice aroma
- Fruit size:** 1.2-1.7 kg
- Resistances:** F1-2, PM1

# Kermit F1

**Fruit shape:**

Oval

Piel De Sapo type melon, white flash

Vigorous plant with great setting ability. Suitable for spring and summer plantings with good leaf coverage and field tolerance. Medium maturity.

Fruits are highly uniform with great taste and nice texture

**Fruit size:**

0.8-2.5 kg

**Resistances:**

F1-2, DM, PM1

## ■ Romingo F1

**Fruit shape:** Oval

Crimson diploid type

Vigorous plant with strong leaf coverage and good field resistances. Suitable for spring and summer plantations for open field production. Excellent setting ability with large size fruits in different climate conditions. Fruits are highly uniform, attractive deep red flash with great taste and texture

**Fruit size:** 9-13 kg

**Resistances:** Anthracnose 1, F0

## ■ Kingo F1

**Fruit shape:** Oval

Crimson diploid type

Vigorous plant with strong leaf coverage and good field resistances. Suitable for spring and summer plantations for open field production. Excellent setting ability with large size fruits in different climate conditions. Fruits are highly uniform, attractive deep red flash with great taste and texture

**Fruit size:** 10-14 kg

**Resistances:** Anthracnose 1, F0

## • Joyarita F1

**Fruit shape:** Round

Diploid, tiger type. Micro-seeds

Vigorous plant with strong leaf coverage and good field resistances. Suitable for spring and summer plantations for open field production. Early setting ability. Fruits are highly uniform, thin peel, attractive deep red flash with great taste and texture

**Fruit size:** 2-2.5 kg

**Resistances:** Anthracnose 1, F0

## • Omali F1

**Fruit shape:** Oval

Triploid, seedless

Vigorous plant with strong leaf coverage and good field resistances. Suitable for spring and summer plantations for open field production. Excellent setting ability under different climate conditions. Fruits are highly uniform, attractive deep red flash with great taste and texture

**Fruit size:** 6-8 kg

**Resistances:** Anthracnose 1, F0

## Toroli F1

**Fruit shape:** Round

Triploid, seedless. Black skin, sugar baby type

Vigorous plant with strong leaf coverage and good field resistances. Suitable for spring and summer plantations for open field production. Excellent setting ability Fruits are highly uniform, thin peel, attractive deep red flash with great taste and texture

**Fruit size:** 5-7 kg

**Resistances:** Anthracnose 1, F0

## Bilmor F1

**Fruit Type:** Beit Alpha

Multi fruits per node. Vigorous plant with strong leaf coverage. Suitable for spring and summer plantations in greenhouse production. Excellent setting ability in hot temperatures. Fruits are highly uniform, attractive dark green skin

**Fruit size:** 15-17 cm

**Resistances:** CMV, PM, DM, ZYMV

## Primor F1

- Fruit Type:** Beit Alpha
- Semi-Multi fruits per node. Vigorous plant with strong leaf coverage. Suitable for spring and autumn plantations in greenhouse production. Excellent setting ability. Fruits are highly uniform, attractive dark green skin and great texture
- Fruit size:** 14-17 cm
- Resistances:** CMV, ZYMV, Px

## Gleemor F1

- Fruit Type:** Beit Alpha
- Single fruits per node. Vigorous plant with strong leaf coverage. Suitable for winter plantations in greenhouse production. Excellent setting ability in cold temperatures. Fruits are highly uniform, attractive green skin
- Fruit size:** 14-16 cm
- Resistances:** CMV, CVYV, ZYM
